

Label: z-bop cat no: zee 003 / zee 003cd
[limited 500 pressings]

GOLIATH - mineral kingdom

z-bop kicks off 2006 in fine style with the first of their new artist projects. All organically home-grown in the westcountry - if you thought the apex twin is all the talent that the deep south west of england has to yield, you're in for some pleasant surprises over the coming seasons...

The label's third release comes from goliath, aka gary kempston - brother of clatterbox and z-bop co-founder. gary has unquestionable pedigree, and this full-length release is just the first from this prolific and flourishing producer.

The goliath technique involves taking pure analogue sound sources and then twisting these into jacking multi-rhythmic beat patterns, offset against haunting and playful backdrops. The final results are all recorded live in one take, with everything you hear handcrafted from the ground up. z-bop style.
